WEEK 2

1# Aligarh Muslim University wants to maintain its database for the Computer Science Laboratory with the following requirements:

a) A student has attributes as Student ID, Name, Enrol Number, Course and Semester.

b) A lab instructor has attributes as Instructor ID, Name, Designation and Experience (in years).

c) Each computer system has attributes as System ID, Processor, RAM, Operating System and Lab Room Number.

d) Each lab session has attributes as Session ID, Date, Time Slot and Subject/course.

e) Each lab instructor may conduct many lab sessions, but each lab session is conducted by only one instructor.

f) A student may attend many lab sessions and a lab session may have many students.

g) A lab session may use many computer systems, and a computer system may be used in many lab sessions over time. Design ER diagram and schema diagram for the above.
